What is Intellectual Disability [ID]?

Mild to severe impairment in intellectual ability equivalent to an IQ of 70 to 75 or below that is accompanied by significant limitations in social, practical, and conceptual skills (as in interpersonal communication, reasoning, or self-care) necessary for independent daily functioning and that has an onset before age 18- [Webster Dictionary]

Why KOVAR? What is KOVAR doing to support individuals with ID?

The Virginia Department of Behavioral Health and Developmental Services estimates there are some 78,000 persons in Virginia with ID. The services provided to these persons covers a wide spectrum from group homes for community living accommodations to day care, education, sports, and job training. The more serious the ID condition of the person the more care is needed.

KOVAR supports a number of tax-exempt organizations throughout Virginia who care for these persons and their needs. KOVAR does this thru a series of monetary grants to help the quality of life for persons with
